- Maintain strong relationships with customers, ensuring their satisfaction and contributing to overall store success.
- Stay up to date with the latest technologies and product knowledge.
- Ability to assess customers' support needs and provide timely solutions or referrals
- Adaptability to rotating through different technical specialties and skill sets
- Thrives in a fast-paced environment with evolving products

## **Full Stack Developer - Freelance**

**November 2022 – Present**

I have built blog sites using HTML, CSS, and JavaScript for front end functionality, in a React.js environment, Java on the back end for login and registration validations as well as adding a Bcrypt service for hashing passwords and security. I built databases using SQL to store and manage text, audio, and video entries along with the username and timestamps, both sites hosted using several AWS services.

## **Full Stack Java Developer - Pyramid Consulting**

**April 2022 – May 2022**

I have created functions, programs, and APIs using Java frameworks . I have also hosted applications using AWS, Cloud Computing, EC2 instance types, elastic block storage and S3, as well as monitor analytics with CloudWatch and CloudTrail. I am fluent in building migration, innovation, and database management using SQL. I typically use GitHub for source control and collaborative development. I have built entire full stack applications from the front end, back end, and the database, to hosting the stack on Amazon Web Services.

## **Managing Director – Bishop Motion Pictures**

**September 2010 – December 2020**

Successfully managed contract employees and delegated tasks for web development projects. Established and maintained relationships with vendors, financial institutions, and state offices. Provided industry-specific training and coaching to clients on web-based products. Developed key presentations for team members and clients, creating national and international marketing tools for multinational corporations.
